PROFESSIONAL SUMMARY

I am a skilled full-stack developer specializing in **React**, JavaScript, and modern UI frameworks. I create responsive and user-friendly interfaces. Additionally, I have developed a **dynamic portfolio** using advanced JavaScript libraries and uploaded multiple projects on **GitHub.** I also have experience working with backend technologies like Java Spring Boot and databases. I continuously improve my skills through certifications and hands-on experience, staying updated with the latest web technologies.

EXPERIENCE

IBM Software Trainee
Coimbatore - September 2024

- Completed IBM Software Trainee program under the Career Educational Program, gaining hands-on experience in software development

TECHVOLT for EMBEDDED SYSTEM -intern
Coimbatore - November 2020

- Gained hands-on experience in IoT, working with sensor integration, data processing, and real-time monitoring systems.

EDUCATION

Government arts college,

Udumalpet - Msc

- Academic year (2022-2024)
- CGPA: 8/10

PROJECTS

Responsive Organic Fruits E-commerce Website

I developed a responsive Organic Fruits e-commerce website using React, incorporating advanced libraries for state management, animations, and form handling. The site delivers a seamless user experience with a modern design and full mobile compatibility.

Multi-Restaurant Food Ordering Web Application

I built a multi-restaurant food ordering web application with a React frontend and Java Spring Boot backend, enabling users to browse menus and place orders seamlessly. The platform supports multiple vendors, real-time updates, and a responsive user interface.

Other projects

Developed a **dynamic portfolio** using advanced JavaScript libraries, created multiple projects and uploaded them on **GitHub**, demonstrating expertise in full-stack development and best coding practices. Link on top

SKILLS

Frontend :

- HTML,
- CSS,
- Bootstrap,
- JavaScript,
- Material UI
- React

Backend :

- Java
- Springboot
- MySQL

Tools:

- Git,
- GitHub,
- PostMan,
